**Presentation title:**

A STUDY ON USER SATISFACTION ANALYSIS FOR DEW OCCURRENCE ON ROAD SIGN

**Other Authors**

Yun,Duk Geun; KICT; KOREA; dkyun@kict.re.kr

**Summary:**

As a road facility to provide road and destination information to driver, road sign has to provide the text and symbols message to drive clearly. However, dew or condensation occurs on the road sign during the huge daily temperature difference. Once the dew occurred on the road sign, the problems in retro-reflectivity, visibility, and legibility of road signs may occur.
