Presentation title:

THE EFFECTS OF CLIMATE CHANGE ON WINTER SERVICE IN GERMANY

Other Authors

Rumpel, Biberach University of Applied Sciences, Germany, rumpel@hochschule-bc.de Gerstengarbe, Potsdam Institute for Climate Impact Research, Germany, Gerstengarbe@pik-potsdam.de

Summary:

During an extensive research project, the effects of climate change on road maintenance and service in Germany throughout the year were analysed. The strongest effects of climate change will occur in the field of winter service, because it depends directly upon the wintry conditions.
