Titre de la présentation:

RÉSILIENCE À L'HIVER DANS UN CLIMAT IMPRÉVISIBLE

Resumé (anglais):

The paper explores the challenges faced in recent winters by the Scottish Government agency Transport Scotland and its Operating Companies in dealing with the winter service on the trunk road network in Scotland. It will highlight the lessons learnt in response to unpredictable winter weather. The paper will show how this was achieved through increased investment and innovation with regard to winter treatments, decision making and communications.
