Presentation title:

TRAFFIC ABILITY FOR HEAVY VEHICLES ON AN INCLINE

Other Authors

Brandli, Per, Norwegian Public Roads Administration, Norway, per.brandli@vegvesen.no

Summary:

Traffic ability for heavy vehicles in steep hills is of great concern in Norway due to the geography with many mountain passes and inclines. Vehicles stopping in the roadway are a big problem on many roads in the winter time, and this is why the Norwegian Public Roads Administration has carried out a project to start looking into what factors influence on the ability for trucks to keep moving also under poor driving conditions in the winter time.
