#### Título de la comunicación:

SIMULACRO DE VIALIDAD INVERNAL: EXPERIENCIA DE LAS AUTOPISTAS DE ABERTIS EN ESPAÑA

#### Otros Autores

Blanco, Víctor; abertis autopistas; Spain; victor.blanco@abertisautopistas.com

#### Resumen (en Inglés):

Spain's highways, as well as other road infrastructures, are subject to basic emergency plans, action plans and specific plans that regulate any emergency situation that may take place as direct result of its use. They also determine responses to risk situations that could affect the population. These plans involve training staff, communicating information to road users, and acquiring and updating resources as well as carrying out annual drills.
