Titre de la présentation:

GESTION DES ÉVÉNEMENTS HIVERNAUX EXTRÊMES EN ALLEMAGNE

Resumé (anglais):

After the experience of two extreme winter periods with heavy snow falls and with strong shortness in salt delivery in the whole country in Germany it was necessary to think seriously about an optimized management of serious winter conditions. Aim is to ensure a minimum flow of traffic also in times of extreme winter events because the whole economy needs a functional road network also in winter times.
